

A scatter plot showing the relationship between GC content (x-axis) and GC content (y-axis) for 1000 random regions. The x-axis is labeled 'GC' and ranges from 50 to 65. The y-axis is labeled 'GC' and ranges from 50 to 65. The plot shows a dense cluster of red points, indicating a strong positive correlation between the two variables. There are also a few blue and green points scattered around the main cluster.
